

In need of clean hard fill for a low spot on your property?

The Vinton County Commissioners' Development Department is compiling a list of potential sites for clean hard fill around the county. As projects on the Building Demolition and Site Revitalization Program get underway this year and next, contractors working under the program may have clean hard fill available.

Clean hard fill consists of reinforced or non-reinforced concrete, asphalt, brick, block, tile, and/or stone. The "clean" in clean hard fill means that the material is not contaminated by solid wastes, infectious wastes, hazardous wastes, or construction and demolition debris. Fill material cannot be placed in regulatory wetlands or floodplains without prior approval from Division of Surface Water and/or U.S. Army Corps of Engineers. Learn more about the regulation of clean hard fill in Ohio Administrative Code 3745-400-05. Ohio EPA's guidance document and Notice of Intent to Fill can be downloaded at: https://dam.assets.ohio.gov/image/upload/epa.ohio.gov/Portals/34/document/guidance/gd_563.pdf

Ideally, each township will have at least two potential locations for clean hard fill. Contact the Development Department to be added to the list of potential sites, which will be shared with any contractors bidding on the program's projects. Being on the list does not guarantee you will receive fill. At the time of demolition, contractors are responsible for obtaining permission from property owners and for submitting Ohio EPA's Notice of Intent to Fill.
